Author Index

ALDRIDGE, K. D.
Dielectrophoretic, thermal instability in a spherical shell of fluid, W. J. Markiewicz and K. D. Aldridge, **(3/4),** 225–236.
Inertial waves in a fluid partially filling a cylindrical cavity during spin-up from rest, S. Stergiopoulos and K. D. Aldridge, **(1/2),** 89–112.

ALFVÉN, H. A.
Review of "Cosmical Plasmas" by H. A. Alfvén. Book review, **(3/4)**, 326–327.

BROWNING, P. K.
The structure of untwisted magnetic flux tubes, P. K. Browning and E. R. Priest, **(3/4)**, 237–263.

BUSSE, F. H.
Differential rotation driven by convection in a rapidly rotating annulus, F. H. Busse and L. L. Hood, **(1/2)**, 59–74.
Nonlinear dynamo oscillations, F. H. Busse, **(1/2)**, 129–141.

COWLING, T. G.
Review of "Cosmical Plasmas" by H. A. Alfvén. Book reviewed by T. G. Cowling, **(3/4)**, 324–327.

DAVIES, P. A.
Review of mechanisms of continental drift and plate tectonics, by P. A. Davies and S. K. Runcorn. Book review, **(3/4)**, 319–321.

DEPASSIER, M. C.
Convection with heat flux prescribed on the boundaries of the system. 1. The effect of temperature dependence of material properties, M. C. Depassier and E. A. Spiegel, **(3/4)**, 167–188.

FRIEDLANDER, S.
Turning surface behaviour for internal waves subject to general gravitational fields, S. Friedlander, **(3/4)**, 189–200.

GODSON, W. L.
Atmospheric thermodynamics (second edition), by J. V. Iribarne and W. L. Godson. Book review, **(3/4)**, 327.

GOLLUB, J. P.
Hydrodynamic instabilities and the transition to turbulence by H. L. Swinney and J. P. Gollub, Book Review, **(3/4),** 328–329.

HARRIS, C. J.
Mathematical modelling of turbulent diffusion in the environment, by C. J. Harris. Book review, **(3/4)**, 316–318.

HIDE, R.
Atmospheric thermodynamics (second edition) by J. V. Iribarne and W. L. Godson. Book reviewed by R. Hide, **(3/4)**, 327.

HOOD, L. L.
Differential rotation driven by convection in a rapidly rotating annulus, F. H. Busse and L. L. Hood, **(1/2)**, 59–74.

HUTTER, K.
A mathematical model of polythermal glaciers and ice sheets, K. Hutter, (**3/4**), 201–224.

IRIBARNE, J. V.
Atmospheric thermodynamics (second edition) by J. V. Iribarne and W. L. Godson. Book Review, (**3/4**), 327.

JONES, C. A.
Hydrodynamic instabilities and the transition to turbulence, by H. L. Swinney and J. P. Gollub. Book reviewed by C. A. Jones, (**3/4**), 328–329.

KIKUCHI, H.
Relation between laboratory and space plasmas, by H. Kikuchi. Book review, (**3/4**), 318–319.

LAUNDER, B. E.
Mathematical modelling of turbulent diffusion in the environment, by C. J. Harris. Book reviewed by B. E. Launder, (**3/4**), 316–318.

MÆLAND, E.
A steady source-sink flow in a two-layer rotating fluid, E. Mæland, (**1/2**), 75–88.

MARKIEWICZ, W. J.
Dielectrophoretic, thermal instability in a spherical shell of fluid, W. J. Markiewicz and K. D. Aldridge, (**3/4**), 225–236.

MASSEY, H.
A perspective of physics, Vol. 4, by Sir H. Massey. Book review, (**3/4**), 315–316.

MELOSH, H. J.
Gravity, deformation and the Earth's crust, by H. Ramberg. Book reviewed by H. J. Melosh, (**3/4**), 322–324.

MELROSE, D. B.
Relation between labratory and space plasmas, edited by H. Kikuchi. Book reviewed by D. B. Melrose, (**3/4**), 318–319.

MOFFATT, H. K.
The role of the helicity spectrum function in turbulent dynamo theory, H. K. Moffatt and M. R. E. Proctor, (**3/4**), 265–283.

PELTIER, W. R.
Review of mechanisms of continental drift and plate tectonics, by P. A. Davies and S. K. Runcorn. Book reviewed by W. R. Peltier, (**3/4**), 319–321.

PRIEST, E. R.
The structure of untwisted magnetic flux tubes, P. K. Browning and E. R. Priest, (**3/4**), 237–263.

PROCTOR, M. R. E.
The role of the helicity spectrum function in turbulent dynamo theory, H. K. Moffatt and M. R. E. Proctor, (**3/4**), 265–283.

RAMBERG, H.
Gravity deformation and the Earth's crust, by H. Ramberg. Book review, (**3/4**), 322–324.

RÜDIGER, G.
Reynolds stresses and differential rotation. 2. Mean field-models, G. Rüdiger (**1/2**), 1–25.

RUNCORN, S. K.
Review of mechanisms of continental drift and plate tectonics, by P. A. Davies and S. K. Runcorn. Book review, (**3/4**), 319–321.

SCHMIDT, W.
Models of solar differential rotation, W. Schmidt, (**1/2**), 27–57.
SIMON, R.
Radiation hydrodynamics on a static fluid, R. Simon (**1/2**), 143–166.
SPIEGEL, E. A.
Convection with heat flux prescribed on the boundaries of the system. 1. The effect of temperature dependence of material properties, M. C. Depassier and E. A. Spiegel, (**3/4**), 167–188.
STERGIOPOULOS, S.
Intertial waves in a fluid partially filling a cylindrical cavity during spin-up from rest, S. Stergiopoulos and K. D. Aldridge, (**1/2**), 89–112.
STEVENSON, D. J.
Reducing the non-axisymmetry of a planetary dynamo and an application to Saturn, D. J. Stevenson, (**1/2**), 113–127.
STIX, M.
On electromagnetic core-mantle coupling, M. Stix, (**3/4**), 303–313.
SWINNEY, H. L.
Hydrodynamic instabilities and the transition to turbulence, by H. L. Swinney and J. P. Gollub. Book review, (**3/4**), 328–329.
TER HAAR, D.
A perspective of physics, Vol. 4, by Sir H. Massey. Book review by D. Ter Haar, (**3/4**), 315–316.
WEISSHAAR, E.
A numerical study of α^2-dynamos with anisotropic α-effect, E. Weisshaar, (**3/4**), 285–301.

Geophys. Astrophys. Fluid Dynamics, 1982, Subject Index to Vol. 21, pp. v–viii

Subject Index

ALPHA EFFECT
A numerical study of α^2-dynamos with anisotropic α-effect, E. Weisshaar, (**3/4**), 285–301.

ALPHA^2-DYNAMOS
A numerical study of α^2-dynamos with anisotropic α-effect, E. Weisshaar, (**3/4**), 285–301.

AXISYMMETRIC FLOWS
Reducing the non-axisymmetry of a planetary dynamo and an application to Saturn, D. J. Stevenson, (**1/2**), 113–127.

BOOK REVIEWS
A perspective of physics, Vol. 4, Sir H. Massey, (**3/4**), 315–316.
Atmospheric thermodynamics (second ediion), by J. V. Iribarne and W. L. Godson. (**3/4**), 327.
Gravity, deformation and the Earth's crust, by H. Ramberg, (**3/4**), 322–324.
Hydrodynamic instabilities and the transition to turbulence, by H. L. Swinney and J. P. Gollub. (**3/4**), 328–329.
Mathematical modelling of turbulent diffusion in the environment, by C. J. Harris, (**3/4**), 316–318.
Relation between laboratory and space plasmas, by H. Kikuchi, (**3/4**), 318–319.
Review of "Cosmical Plasmas", by H. A. Alfvén, (**3/4**), 324–327.
Review of mechanisms of continental drift and plate tectonics, by P. A. Davies and S. K. Runcorn, (**3/4**), 319–321.

BOUNDARY CONDITIONS
A mathematical model of polythermal glaciers and ice sheets, K. Hutter, (**3/4**), 201–224.
Convection with heat flux prescribed on the boundaries of the system. 1. The effect of temperature dependence of material properties, M. C. Depassier and E. A. Spiegel, (**3/4**), 167–188.

CONTINENTAL DRIFT
Review of mechanisms of continental drift and plate tectonics, by P. A. Davies and S. K. Runcorn, Book review, (**3/4**), 319–321.

CONVECTION
Convection with heat flux prescribed on the boundaries of the system. 1. The effect of temperature dependence of material properties, M. C. Depassier and E. A. Spiegel, (**3/4**), 167–188.
Differential rotation driven by convection in a rapidly rotating annulus, F. H. Busse and L. L. Hood, (**1/2**), 59–74.

CORE-MANTLE BOUNDARY
On electromagnetic core-mantle coupling, M. Stix, (**3/4**), 303–313.

COSMICAL PLASMAS
Review of "Cosmical Plasmas" by H. A. Alfvén. Book review, (**3/4**), 324–327.

DIELECTROPHORETIC INSTABILITY
Dielectrophoretic, thermal instability in a spherical shell of fluid, W. J. Markiewicz and K. D. Aldridge, (**3/4**), 225–236.

DIFFERENTIAL ROTATION
Differential rotation driven by convection in a rapidly rotating annulus, F. H. Busse and L. L. Hood, (**1/2**), 59–74.
Models of solar differential rotation, W. Schmidt, (**1/2**), 27–57.
Reynolds stresses and differential rotation. 2. Mean-field models, G. Rüdiger, (**1/2**), 1–25.

DYNAMO PROCESSES
Models of solar differential rotation, W. Schmidt, (**1/2**), 27–57.
Nonlinear dynamo oscillations, F. H. Busse, (**1/2**), 129–141.
A numerical study of α^2-dynamos with anisotropic α-effect, E. Weisshaar, (**3/4**), 285–301.
Reducing the non-axisymmetry of a planetary dynamo and an application to Saturn, D. J. Stevenson, (**1/2**), 113–125.
The role of the helicity spectrum function in turbulent dynamo theory, H. K. Moffatt and M. R. E. Proctor, (**3/4**), 265–283.

EARTH'S ATMOSPHERE
Atmospheric thermodynamics (second edition), by J. V. Iribarne and W. L. Godson. Book review, (**3/4**), 327.

EARTH'S CORE
On electromagnetic core-mantle coupling, M. Stix (**3/4**), 303–313.

EARTH'S CRUST
Gravity, deformation and the Earth's crust, by H. Ramberg. Book review, (**3/4**), 322–324.

EARTH'S MANTLE
On electromagnetic core-mantle coupling, M. Stix, (**3/4**), 303–313.

FLUX TUBES
The structures of untwisted magnetic flux tubes, P. K. Browning and E. R. Priest, (**3/4**), 237–263.

GENERAL FLUID MECHANICS
A perspective of physics, Vol. 4, by Sir H. Massey. Book review, (**3/4**), 315–316.

HEAT FLUX
Convection with heat flux prescribed on the boundaries of the system. 1. The effect of temperature dependence of material properties, M. C. Depassier and E. A. Spiegel, (**3/4**), 167–188.

HELICITY
The role of the helicity spectrum function in turbulent dynamo theory, H. K. Moffatt and M. R. E. Proctor, (**3/4**), 265–283.

HELICITY SPECTRUM FUNCTION
The role of the helicity spectrum function in turbulent dynamo theory, H. K. Moffatt and M. R. E. Proctor, (**3/4**), 265–283.

ICE SHEETS
A mathematical model of polythermal glaciers and ice sheets, K. Hutter, (**3/4**), 201–224.

INERTIAL WAVES
Inertial waves in a fluid partially filling a cylindrical cavity during spin-up from rest, S. Stergiopoulos and K. D. Aldridge, (**1/2**), 89–112.

INTERNAL GRAVITY WAVES
Turning surface behaviour for internal waves subject to general gravitational fields, S. Friedlander, (**3/4**), 189–200.

MAGNETOHYDRODYNAMICS
Dielectrophoretic, thermal instability in a spherical shell of fluid, W. J. Markiewicz and K. D. Aldridge, (3/4), 225–236.
On electromagnetic core-mantle coupling, M. Stix, (3/4), 303–313.
The structure of untwisted magnetic flux tubes. P. K. Browning and E. R. Priest, (3/4), 237–263.
MATHEMATICAL MODELS
A mathematical model of polythermal glaciers and ice sheets, K. Hutter, (3/4), 201–224.
MEAN-FIELD MODELS
Reynolds stresses and differential rotation. 2. Mean-field models, G. Rüdiger, (1/2), 1–25.
NONLINEAR DYNAMOS
Nonlinear dynamo oscillations, F. H. Busse, (1/2), 129–141.
PLANETARY DYNAMOS
Reducing the non-axisymmetry of a planetary dynamo and an application to Saturn, D. J. Stevenson, (1/2), 113–125.
PLASMAS
Relation between laboratory and space plasmas, by H. Kikuchi. Book review, (3/4), 318–319.
Review of "Cosmical Plasmas" by H. A. Alfvén. Book review (3/4), 324–327.
PLATE TECTONICS
Review of mechanisms of continental drift and plate tectonics by P. A. Davies and S. K. Runcorn. Book review, (3/4), 319–321.
POLYTHERMAL GLACIERS
A mathematical model of polythermal glaciers and ice sheets, K. Hutter, (3/4), 201–224.
RADIATION HYDRODYNAMICS
Radiation hydrodynamics on a static fluid, R. Simon, (1/2), 143–166.
REYNOLDS STRESSES
Reynolds stresses and differential rotation. 2. Mean-field models, G. Rüdiger, (1/2), 1–25.
ROTATING ANNULUS
A steady source-sink flow in a two-layer rotating fluid, E. Mæland, (1/2), 78–88.
Differential rotation driven by convection in a rapidly rotating annulus, F. H. Busse and L. L. Hood, (1/2), 59–74.
ROTATING FLUIDS
Dielectrophoretic, thermal instability in a spherical shell of fluid, W. J. Markiewicz and K. D. Aldridge, (3/4), 225–236.
Differential rotation driven by convection in a rapidly rotating annulus, F. H. Busse and L. L. Hood, (1/2), 59–74.
Inertial waves in a fluid partially filling a cylindrical cavity during spin-up from rest, S. Stergiopoulos and K. D. Aldridge, (1/2), 89–112.
Models of solar differential rotation, W. Schmidt, (1/2), 27–57.
Reynolds stresses and differential rotation. 2. Mean-field models, G. Rüdiger, (1/2), 1–25.
ROTATING STRATIFIED FLUIDS
A steady source-sink flow in a two-layer rotating fluid, E. Mæland, (1/2), 75–88.
Turning surface behaviour for internal waves subject to general gravitational fields, S. Friedlander, (3/4), 189–200.

SATURN
Reducing the non-axisymmetry of a planetary dynamo and an application to Saturn, D. J. Stevenson, (**1/2**), 113–125.

SOLAR ATMOSPHERE
The structure of untwisted magnetic flux tubes, P. K. Browning and E. R. Priest, (**3/4**), 237–263.

SOLAR CYCLE
A numerical study of α^2-dynamos with anisotropic α-effect, E. Weisshaar, (**3/4**), 285–301.

SOLAR MAGNETISM
A numerical study of α^2-dynamos with anisotropic α-effect, E. Weisshaar, (**3/4**), 285–301.

SOURCE-SINK FLOWS
A steady source-sink flow in a two-layer rotating fluid, E. Mæland, (**1/2**), 75–88.

SPIN-UP
Inertial waves in a fluid partially filling a cylindrical cavity during spin-up from rest, S. Stergiopoulos and K. D. Aldridge, (**1/2**), 89–112.

STABILITY
Dielectrophoretic, thermal instability in a spherical shell of fluid, W. J. Markiewicz and K. D. Aldridge, (**3/4**), 225–236.
Hydrodynamic instabilities and the transition to turbulence, by H. L. Swinney and J. P. Gollub. Book review, (**3/4**), 328–329.

STATIC FLUIDS
Radiation hydrodynamics on a static fluid, R. Simon, (**1/2**), 143–166.

SUN
Models of solar differential rotation. W. Schmidt, (**1/2**), 27–57.

TECTONICS
Gravity, deformation and the Earth's crust, by H. Ramberg. Book review, (**3/4**), 322–324).
Review of mechanisms of continental drift and plate tectonics by P. A. Davies and S. K. Runcorn. Book review, (**3/4**), 319–321.

TURBULENCE
Hydrodynamic instabilities and the transition to turbulence by H. L. Swinney and J. P. Gollub. Book review, (**3/4**), 328–329.
Mathematical modelling of turbulent diffusion in the environment by C. J. Harris. Book review, (**3/4**), 316–318.
The role of the helicity spectrum function in turbulent dynamo theory, H. K. Moffatt and M. R. E. Proctor, (**3/4**), 265–283.

TURNING SURFACES
Turning surface behaviour for internal waves subject to general gravitational fields, S. Friedlander, (**3/4**), 189–200.
